

## Capability statement

Shark Co. Ltd · Freshwater Supply · Registration in progress · Version 1.0 · 30 September 2026

**Shark** is a Ugandan freshwater supply and construction company founded by **Hassan Maweje**, who has travelled more than a thousand villages.† We find the water first through underground survey, build pumps, tanks, pipes, sanitation and farm-water systems to standard with registered and permitted specialists, and train local people to keep them running.

| Differentiators                                                                                         | How we work                                                                               |
|---------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------|
| <b>Survey-led:</b> water is located and verified before we build                                        | <b>Survey:</b> site visit, underground assessment, written report                         |
| <b>Standards-driven:</b> permitted specialists, honest records, written warranty                        | <b>Design:</b> bill of quantities and fixed-price quotation                               |
| <b>Community-first:</b> local jobs, training and mentorship; target of 10,000 livelihoods in five years | <b>Build, service and train:</b> supervised installation, service tag, caretaker training |

| Status and compliance                   | Position today                                                                            |
|-----------------------------------------|-------------------------------------------------------------------------------------------|
| Company incorporation (URSB)            | In progress                                                                               |
| Tax registration, trading licence, e-GP | After incorporation                                                                       |
| Borehole drilling                       | Through a registered drilling partner                                                     |
| Electrical installation                 | Led by permitted electricians                                                             |
| Policies                                | Health, safety and environment; ethics and anti-corruption; safeguarding; quality (draft) |

| Reach and contact                       | Details                                                                                        |
|-----------------------------------------|------------------------------------------------------------------------------------------------|
| Headquarters (planned)                  | Chibuli, Kampala                                                                               |
| Branches (planned)                      | Mukono (Seeta); Bolenga (Mwenda Stage)                                                         |
| Districts where our founder has worked† | Nakasongola, Kayunga, Nakaseke, Buikwe and others                                              |
